BRIDGES UPDATE

TO: BabyNet Providers

SUBJECT: Bulk Approval Enhancements in BRIDGES

This update describes recent enhancements to the bulk approval function in BabyNet Reporting and Intervention Data Gathering Electronic System (BRIDGES). These enhancements streamline the approval workflow, reduce unnecessary data visibility, introduce new filtering options to help users efficiently review approval activity and better align bulk approval with its intended operational purpose. These changes impact BRIDGES users serving as an agency administrator.

Data Grid Updates

To simplify the bulk approval data grid and reduce visual clutter, the following fields have been removed:

- Rate
- Max EI payment
- Billed amount

Approval History Filter - New Feature

A new approval history filter has been added to the bulk approval criteria section to help users quickly locate recent approval activity.

Approval History Criteria

Users can now select the reporting range as follows:

- Last 10 days
- Last 90 days
- Last 180 days

Approval History:															
Last 10 Days															
Child ID	Child Name	Service Log ID	Service	Hour	Payor	Claim Date (Service Log Entry Date)	Approve Date	Approved?	Note	Service Note	Correction/Addendum	Planned Period	Planned Setting	Intensity * Frequency	Delivered Setting

How the Approval History Filter Works

- The selected option limits the results displayed in the bulk approval grid.
- Only records with approval activity within the selected time frame will be returned.

- This filter helps users:
 - Focus on recent approvals;
 - Reduce large result sets; and
 - Improve system performance during searches.

For any questions related to this BRIDGES update, please contact Stephanie Donald at Stephanie.Donald@scdhhs.gov or call (803) 898-4439.

Thank you for your continued support of the South Carolina Healthy Connections and BabyNet programs.
