QTIP ASTHMA DRIVER DIAGRAM

Key Drivers **Secondary Drivers** **Change Ideas**

SMART Aim:
Increase SMART therapy initiation when indicated by 10%

Optimal Asthma management

- Access to primary care for preventive and follow up care
- Asthma care as per the NHLBI guidelines
- Assessment of asthma control
- Collaboration with partners using AAP
- Influenza vaccine access

- Create Asthma registry
- Make EMR Changes to flag Asthma patients
- Standardize process to make Asthma follow up appointments
- Standardize ACT at WCCs for Asthma patients
- Incorporate Asthma action plants into EMR and share in the portal
- Staff education about SMART therapy

STRATEGIC GOAL:
Improve care and asthma control for primary care patients with asthma

Optimal Asthma care at home

- Ask and address SDOOH
- Asthma education
- Identifying and minimizing asthma triggers
- Secondhand smoke exposure
- Medication compliance

- Asthma education for patient/family
- Trigger identification/reduction
- Implementing screening for SDOH in Asthma patients
